

**PROJECT UPDATE
EAST HIGH STREET IMPROVEMENT PROJECT**

Contractor: VTF Excavation, LLC

Subcontractors: EJP

***Projection of Work to be Performed
for week beginning July 9, 2018***

New water line will be installed between Pearl and Clinton Street. Once the line is tested, services will be switched to the new main. Storm sewer will be installed from Pontiac Park across River Road and will progress toward High Street.

Please note the main line water tap from East High to Clinton Street will occur July 10th. This will reduce northbound Clinton Street traffic to one lane between River Road and Broadway for one day

Please note the storm sewer crossing River Road from Pontiac Park will occur on July 11th. This will close River Road to thru traffic for one day. Thru traffic shall use East High Street. Access to Pontiac Park will be maintained from Clinton Street.

Delays to traffic will be experienced. Please use caution when travelling through the area.

All work indicated above is weather dependent.

Please feel free to contact me for any additional information.

Respectfully:

Melinda K. Sprow, City Engineer
