

DRIVE APPROACH SLOPES

NOTE: New drive approaches which, because of existing ground conditions, will exceed the Maximum slope shown hereon or will in any way conflict with the details of this drawing shall be approved by the Engineer before any construction is started.

Any Drive, having a change of slope occurring in a distance of less than 10ft., may exceed the maximum design slope providing the crest or dip does not exceed $3\frac{1}{2}$ " in a 10ft. chord.

Further reference is made to the Standard Drawing for Drive Approaches.

NOTE: To determine the max. garage slab elev. Allow for a 20' long approach slab at the garage entrance. Use $\frac{1}{8}$ " ft. slope on slab.
